Reviews

Great eBook and beneficial one. Yes, it is actually play, nevertheless an amazing and interesting literature. I found out this book from my i and dad recommended this ebook to understand.

(Jessyca Lubowitz I)

THE MESSENGER OF MATHEMATICS VOLUME 36 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .Bd. XLVI., 1895, p. j For this word (Grenzelement), cf. Phil. Mag., March, 1904, p. 296, and Crelle s Journ. fur Math., Bd. cxxvin., 1905, p. 187. Cf. Schonflies, op. cit., pp. C3-64, 28, 31-33. Consider any series with ends; suppose that each term x of it is contained within some particular interval of terms of the series between a and b (the interval being the series of these latter terms, together with a and b), and apply the argument of III. If we suppose that we can get from end to end of the series by using the ordinal numbers less than \aleph_1 , where \aleph_1 may be of any class, we can replace all the intervals by a finite partial-series of them, by the successive abolition of Limes-terms. Thus we see that, given a series of type \aleph_1 , the necessary and sufficient condition that the Heine-Borel theorem should hold of the series is that \aleph_1 is closed. Also, if the series is contained in another (or the same) closed one, just as a point -aggregate is contained in the continuum, the necessary and sufficient condition that the HeineBorel theorem should be applicable to the former is that it should be closed with respect to the latter; that is to say, the Limes of fundamental series of terms of the former in the latter is also a term of the former. We must note that a series of closed type may be contained in a...
