Book Condition: New. Publisher/Verlag: Springer, Berlin | Following remarkable advances in medical care, the past decade has witnessed a significant improvement in the survival of patients with many different forms of heart disease. In the majority of cases, however, the advances have been palliative and not curative. The result has been the production of an ever-increasing population of patients with heart disease, many of whom suffer from myocardial dysfunction and latent or overt heart failure. Heart failure is now a major cause of morbidity and mortality in cardiac patients. This book aims to combine in a single volume data relating to both pathophysiological mechanisms and the clinical management of the patient with heart failure. It includes chapters dealing with molecular, biochemical, and pathophysiological aspects of heart failure, ventricular function and its assessment, and the clinical aspects of heart failure in different cardiac disorders, including ischemic heart disease, valvular heart disease, and the cardiomyopathies. There are sections on pharmacotherapy, the role of arrhythmias, exercise physiology, and neurohumoral mechanisms. The book also deals with newer interventional techniques, newer surgical procedures and some current problems relating to cardiac assist devices and heart and heart-lungs transplantation. | 'Molecular and Biochemical Aspects.- Autonomic Receptor Function in Congestive Heart Failure.- Beta-Adrenoceptors in Heart Failure: A Mechanism or a cAMP Follower?.- Anti-?-Adrenoceptor Autoantibodies with ?-Adrenergic Agonistic Activity from Patients with Myocarditis and Dilated Cardiomyopathy.- Pathophysiological Aspects of Heart Failure.- Heart Failure: Etiological Models and Therapeutic Challenges.- Vascular Compliance in Heart Failure: A Contributor to Impedance, and the Response to Vasodilator Drugs.- Cardiac and Baroreflex Control of the Circulation in Heart Failure.- Ventricular Function in Heart Failure.- Matching of Ventricular Properties with Arterial Load Under Normal and Variably Depressed Cardiac States.- Targeting Evaluation and Treatment of Heart Failure by Pressure-Volume Relations.- Importance of the...
