Mathematical Questions and Solutions, from the Educational Times. Volume 24 (Paperback)

By Anonymous

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1876 edition.

Excerpt: .then if F, F are centres of force, each force varying as (distance), prove that (1) the resultant force upon any point P on the circle is in the direction of a fixed point S on the axis OFF ; and if, moreover, the forces at the unit of distance are as $(OF)(1)$ to $(OF)(1)$ then (2) the resultant force is proportional to $(SP)(1 - 1) \cdot (PV) - i(t1)$, where PV is the chord through S . prove that two circles and another point may be taken arbitrarily, and that the circles abc meet the circles def in six new points which lie on the circumference of another circle. 4723. (By Prof. Crofton.)--Give a geometrical method of drawing normals to a parabola from a point on the curve. I. Solution by Professor Minchin. When three normals meet in a point, the chord joining the feet...
